

To our valued customers and partners,

It was widely announced that on May 10th the US government imposed a tariff of 25% on \$200 billion worth of goods shipping from China; a 15% increase from the previous 10% placed last September. In addition to this the current US administration has initiated the process of placing a 25% duty on almost all remaining trade coming from China. This will undoubtedly raise costs for many businesses.

Tomax USA is committed to limiting the effect on prices and will bear the partial duty to our maximum capacity. We've also commenced negotiations with our factories to help support us with discounted costs which we intend to pass on to our customers. Our top priority is to limit the impact to your business.

This commitment means we plan to continue honoring current pricing on a majority of our products for the foreseeable future. We encourage everyone to check our website for the most up to date information and take advantage of our low prices on top quality tech.

Thank you for your continued support and for choosing us as your business partner.

Best Regards,

Tomax USA
