PRODUCT INFO

Meet Gemini, a 10,000 mAh power bank with an one-of-a-kind shareable charging experience! Gemini can be split easily into two for sharing with a friend. Each halves can function as an independent 5000 mAh power bank: The primary unit includes a digital battery display that shows precise battery level, and a built-in cable with a lightning tip perfect for Apple devices. The secondary unit has a more traditional LED light power display, but includes a build-in connector for easy plug-and-go charge. The carrying loop can transform into a Type-C to Type-C charging cable, ready for charging multiple devices on the same power bank. Gemini is a convenient and reliable power bank for both going solo and going with a pal!

-Prop 65 certified
